To all Members

Seafarers' Nationality Demographics

At its recent meeting, the Britannia Standards Sub Committee asked the Managers to produce updated data to identify the nationalities of those serving on board entered ships, in order to better understand crew illness and injury statistics.

We would therefore be grateful if Members could provide us with an indication of the number of officers, crew and cadets of each nationality, employed directly or through manning agents, on board their ships entered with Britannia, by completing the Seafarers' Nationality Demographics form at [SurveyMonkey](#).

Please complete the form by 31 December 2018.
