

## LOSS PREVENTION UPDATE

### DRY BULK SHORTAGES IN VIETNAM

SPICA, our local correspondent in Vietnam, has issued an informative update on the difficulties of conducting dry bulk cargo operations in Vietnam.

The update outlines potential shortage disputes, especially when surveyors representing cargo interests go unchallenged. It also offers practical guidance on improving draught mark legibility, using a calibrated hydrometer and ensuring all sounding pipes are ready for use.

Members are reminded to consult the Club's published guidance on [draught surveys](#) when planning critical operations of this kind. Our website also provides additional resources on dry bulk cargo handling for reference.

Find the SPICA update [here](#).
